BUDGET:	EUR 47 250 – EU FUNDING: EUR 47 250 (100 %)
WEBSITE:	N/A

The regional initiative, entitled '**Training and Administrative Networking in Cultural and Artistic Projects**' aims to develop regional capacity in alignment with professional, executive, and transparency principles.

To achieve this goal, regional partners have been identified. Online workshops have been prepared, developed, and made available online. Information related to sectoral issues has been gathered.

Furthermore, high-level regional experiences have been shared, and common problems associated with the administration and management of cultural projects in the region's countries have been identified. A shared code of conduct for cultural project beneficiaries in the region was developed, offering strong support for professionalism and ethical transparency.

Finally, the creation of an online platform has facilitated the dissemination of these guidelines, provision of services, and the generation of recommendations to address issues encountered in cultural projects.
