WEBSITE:	N/A

The '**Digitoonz Afrika 2023**' project aims to revitalize and promote the Senegalese comic book sector.

In this regard, the House of Comics and Image, the first dedicated digital comic book space in Senegal, has been inaugurated and seeks to become a major cultural hub, strengthening the community of comic book creators and enthusiasts while ensuring its sustainability.

To achieve this, sector stakeholders, including writers, graphic designers, illustrators, cartoonists, and artists, have been trained. Emphasis has been placed on enhancing their skills in scriptwriting methods and mastering digital illustration techniques to produce digital comic works that reflect Senegalese culture and imagination.

Furthermore, a «Webtoon» platform, entirely dedicated to promoting Senegalese comic books digitally, has been created, allowing local creators to gain recognition nationally and internationally and to align with technological advancements and market trends.
