BUDGET:	EUR 12 000 – EU FUNDING: EUR 12 000 (100 %)
WEBSITE:	N/A

'Progressing works towards the development of Fiji's National Cultural Statistics framework (FNCSF) aims to advance the development of Fiji's National Cultural Statistics Framework (FNCSF).

In this context, an initial phase of framing and mapping processes will involve the development of Fiji's National Cultural Statistics Framework (FNCSF), ensuring that decisions take into account various target groups. Emphasis will be placed on engaging a broad range of participants from different demographic backgrounds and locations.

Furthermore, a technical working committee comprising members of both genders will be established and tasked with guiding the development of the national cultural statistics framework.

Community and stakeholder consultations will be designed to be inclusive, involving men, women, youth, individuals, and persons with disabilities from urban, rural, and marginalized communities across Fiji's four divisions.

Finally, the development of the FNCSF from the mapping process aims to support artisans at the local level, creating a platform for sustainable livelihoods and promoting intangible cultural heritage.
